## PLEDGE

India is my country. All Indians are my brothers and sisters.

I love my country, and I am proud of its rich and varied heritage. I shall always strive to be worthy of it.

I shall give respect to my parents, teachers and all elders and treat everyone with courtesy.

I pledge my devotion to my country and my people. In their well-being and prosperity alone lies my happiness.

Dear students,

We have already realised how learning can be made an enjoyable experience by observing and analysing changes around us. Science is an ever expanding branch of knowledge and the study of science, a continuous process.

The knowledge you construct through thinking, collecting data and sharing your experiences with friends takes the learning process ahead. A number of questions will arise in your mind when you indulge in the process of knowledge construction. You may not get answers for all of them. It is your own responsibility to engage in the exploration of new avenues of knowledge and formulate ways for finding answers to such questions. Your textbook and your teacher will be with you in this attempt.

Learning becomes enjoyable only when learning activities cease to be burdensome. Many such possibilities are available in this book. May your journey through science, along with your friends, make learning a blissful experience and a real celebration.

With love and regards,

**Prof. M.A. Khader**
